

Mahdieh Najmi

Full-Stack Software Developer & AI Data Engineer

 [linkedin.com/in/mahdiehnajmi](https://www.linkedin.com/in/mahdiehnajmi)  mayanajmi.app

SUMMARY

Full-Stack Software Developer & AI Engineer with 10+ years of experience delivering enterprise applications across automotive, healthcare, and newcomer-support domains. Proven track record of designing scalable cloud architecture, building high-performance APIs, and collaborating across Agile teams from concept to deployment. Currently focused on AI application design, including system architecture, intelligent workflows, and scalable cloud deployments.

EXPERIENCE

Backend Developer (Co-Op)

Dec 2025 – Present

CollectiveInterchange

St. John's, NL

- Designed and implemented backend components for the NewcomerNavigatorNL application using Python, Pydantic, Beanie, and MongoDB.
- Designed and implemented MongoDB schemas for efficient data storage and retrieval.
- Collaborated with cross-functional team members through code reviews and pull requests to maintain high code quality and consistency.
- Contributed to team problem-solving and task coordination to ensure smooth project development.

Full Stack Software Developer

Nov 2024 – Mar 2025

SiftMed

St. John's, NL

- Developed full-stack features for a healthcare platform using React, TypeScript, JavaScript, HTML, and CSS.
- Designed scalable MySQL and PostgreSQL database structures for efficient medical document management.
- Built and maintained RESTful and GraphQL APIs enabling secure frontend-backend communication.
- Managed AWS infrastructure (EC2, S3, RDS) and CI/CD pipelines, using Git for source control and code reviews.

Full-Stack Web Developer

Feb 2024 – Apr 2024

Kiderra

St. John's, NL

- Designed the application database schema and set up a Node.js / Express.js backend server.
- Integrated PostgreSQL with the backend for reliable data persistence.
- Developed RESTful API endpoints for user registration, login, and profile management.

Full Stack Developer

2008 – 2023

SAIPA Automotive Corporation

- Designed and maintained enterprise-level applications supporting business operations (quality control, warehouse, procurement, planning systems).
- Documented functional and technical requirements across multiple projects.
- Analyzed large datasets and optimized system processes to improve efficiency and reporting accuracy.
- Led system testing, implementation, and post-deployment support.
- Produced detailed technical documentation and conducted user training sessions.
- Contributed to system enhancements and continuous improvement initiatives.
- Connected curated tables to the Power BI report for operational visibility.

EDUCATION

Master's Degree in Computer Engineering
Memorial University

Sep 2023 – Sep 2025

Master's Degree in EMBA
Qazvin Azad University

Bachelor's Degree in Software Engineering
Arak Azad University

SKILLS

Languages: JavaScript, TypeScript, PHP, Python, SQL, HTML5, CSS3
Frameworks: React, Node.js, Express.js
APIs & DevOps: RESTful APIs, JSON, API integration, Docker, Kubernetes
Databases: Oracle, SQL Server, MySQL, PostgreSQL, MongoDB
Tools: Jupyter, Git, GitHub Actions, Power BI, Postman
Cloud: AWS (Lambda, IAM, EC2, S3, RDS, SageMaker AI)
Practices: Agile methodologies, debugging, system optimization, refactoring

ADDITIONAL QUALIFICATIONS

- Strong communication and interpersonal skills.
- Excellent analytical and troubleshooting abilities.
- Experience working with cross-functional teams and diverse stakeholders.
- Ability to quickly learn new technologies and business processes.
- Interest in intellectual property, innovation, and technology-driven organizations.
- Comfortable working independently in remote and hybrid environments.

CERTIFICATES

- **Professional Skill Development Program** — Memorial University
- **AI for Data Engineering** — techNL
- **Artificial Intelligence Fundamentals** — IBM
