Portfolio: <https://mayanajmi.app/>

Objective

AI-focused Software Engineer with 8+ years of experience building scalable applications and a recent specialization in AI and data engineering. Proficient in modern frameworks, with hands-on experience developing end-to-end AI solutions, including data pipelines, feature engineering, and LLM-based applications. Experienced with cloud platforms such as AWS and familiar with DevOps practices, CI/CD, and version control. Passionate about applying AI to real-world problems, collaborating with cross-functional teams, and delivering high-quality, production-ready systems.

Technical Skills:

- Experienced in JavaScript, TypeScript, Python, SQL, HTML5, CSS3
 - Experienced in Runtime Environments, Frameworks & Libraries like Node.js, React, and Express.js
 - Experienced in RESTful APIs, JSON, and API integration
 - Experienced in Databases like: Oracle, SQL Server, MySQL, PostgreSQL, and MongoDB
 - Experienced in Tools & Platforms like Jupyter, Git, GitHub, and Postman
 - Experienced in cloud platforms like AWS services(Lambda, IAM, EC2, S3, RDS, SageMakerAI, Step Functions)
 - Knowledgeable about Docker and Kubernetes, and Cursor
-

Education:

- Master's Degree in Computer Engineering | Memorial University
 - Master's Degree in EMBA | Qazvin Azad University
 - Bachelor's Degree in Software Engineering | Arak Azad University
-

Work Experience:

Backend Developer | CollectiveInterchange , St. Johns, NL - Co-Op [December 2025 - now]

- Designed and implemented backend components for the NewcomerNavigatorNL application using Python, Pydantic, Beanie, and MongoDB.
- Designed and implemented MongoDB schemas for efficient data storage and retrieval.
- Collaborated with cross-functional team members through code reviews and pull requests to maintain high code quality and consistency.
- Contributed to team problem-solving and task coordination to ensure smooth project development.

Full Stack Software Developer | [Sift Med, St. Johns, NL] [November 2024 – March 2025]

- Architected and implemented database structures for medical documents using MySQL, ensuring efficient data management and retrieval.
- Spearheaded the development of application features for medical documentation, leveraging React, TypeScript, JavaScript, HTML, and CSS for a seamless front-end experience
- Developed RESTful and GraphQL APIs for seamless data exchange between front-end and back-end services.
- Managed cloud deployment using AWS EC2, S3, and RDS; implemented CI/CD pipelines for smooth and automated releases.
- Managed version control of application components using Git, facilitating collaborative development and maintaining code integrity.

Full-Stack Web Developer | [Kiderra, St. Johns, NL] [February 2024 – April 2024]

- Design the database schema for the application
- Set up the backend server using Node.js with Express.js
- Integrate the chosen database system (PostgreSQL) with the backend
- Developed RESTful API endpoints for user registration, login, and profile management

Full Stack Developer | [SAIPA Automotive Corporation] | [2008 – 2023]

- Full Stack developer, designed and maintained data-driven applications using **Oracle technologies, React, Node.js, express.js and PostgreSQL** for more than 7 software applications, such as Quality Control system, Vehicle Auction system, Warehouse, Asset, Purchase and Planning System.
- Supported the development and deployment of web applications like Vehicle Auction and Audit using **React, Node.js, and Postgres database**.
- Designed scalable APIs and handled data integration tasks.
- Debugged and resolved technical issues to improve system reliability.
- Collaborated with cross-functional teams to identify technical requirements and deliver solutions aligned with user needs.
- Worked closely with clients to resolve technical issues and deliver tailored solutions aligned with business goals.
- Prepared **Technical Documentation**, performed research on emerging technologies, and presented findings to stakeholders

Certifications:

- Professional Skill Development Program - Memorial University.
- AI for data engineering - techNL
- Artificial Intelligence Fundamentals - IBM
